

# Hepatitis B Treatment Study Recruiting Now

- **Do you have chronic hepatitis B?**
  - **Are you interested in taking part in a study for hepatitis B treatment?**

At the Institute of Human Virology at the University of Maryland, we are studying the effect of approved hepatitis B medications on the infection. Our goal is to help develop strategies for hepatitis B cure.

**What this study involves:** We will provide hepatitis B treatment with the newest approved medication, called Tenofovir Alafenamide, for up to 2 years. We will be collecting blood samples during this time.

**To be eligible,** you must be at least 18 years old and have hepatitis B.

- The medication will be provided free. Compensation given for time.

If you are interested in getting your hepatitis B treated or interested in learning more about this program, please contact: **Ka Wing Joyce Lam at 410-706-3367 / [jlam@ihv.umaryland.edu](mailto:jlam@ihv.umaryland.edu)**

The Institute of Human Virology, Clinical Research Unit 725 W. Lombard Street, Baltimore, MD 21201
