Research Study Volunteers Needed

We want to study to see which patients are at increased risk for heart disease by taking pictures of your heart vessels on a CAT scan, and if your risk changes

YOU MAY BE ELIGIBLE IF YOU:

- Adult infected with HIV, hepatitis C, or both
- Have no history of heart disease (heart attack, stroke, etc.)
- Not taking any diabetes medication(s)
- HIV+ patients must have been on HIV regimen for 6 months or more
- HIV + patients must have viral load that is undetectable
- Hep C+ patients must be getting ready to start hepatitis treatment

STUDY PROCEDURES:

- 5 study visits (4 for HIV + only patients)
- Blood draws at all study visits and 2 coronary CAT scans

WHERE: Institute of Human Virology 725 W. Lombard Street Baltimore, MD 21201

Eligible Participants can earn up to \$400-445
